

Concurrent with the provisions of the Nigerian Electricity Distribution/Retail Sector Multi-Year Tariff Order, 2012, (MYTO 2) and NERC's guidelines for Tariff Consultation, The PORT-HARCOURT ELECTRICITY DISTRIBUTION COMPANY (PHED) hereby gives notice to the general public and in particular residents of Akwa Ibom, Bayelsa, Cross River and Rivers States, of its intention to carry out a review of electricity tariff.

The purpose of this exercise is to set a tariff that reconciles the requirements for a cost reflective tariff with customer's needs. In doing so, PHED will consider options that can increase electricity supply such as embedded generation projects, alternative tariff design, allocation of energy losses and a long term tariff path that smoothens tariff changes for customers.

Details of the intended tariff review may be found in the consultation paper published on PHED's website, www.phed.com.ng. This document will also be made available at various offices of PHED for a period of 2 weeks, during which period comments are welcome.
